Final-year Software Engineering student (GPA 2.36/4) with a backend-oriented mindset, specializing in Java and Spring Boot. Experienced with REST APIs, PostgreSQL/MS SQL, and Spring Security fundamentals through projects and internships. Open to full-time remote roles after graduation.

Highlights from my projects

- A “transparent” full-traceable donation platform via foundations/associations,
- Task manager website which is on live via render, vercel and aiven,
- An app that prevents you to miss daily prayers via tracing your .exe game processes,
- An keyboard assistant named Smart Chat, edits your text based on your local slang,
- Designing/training statistical, machine, and deep learning models based on Python,
- Pharmacy track system,
- Bingo game using various Data Structures,
- Offline E-mail app,
- Java-based cargo tracking and product management system,
- Custom python library design,
- C-language based train wagon management system (pointer arithmetic),
- RISK (board game) game on AWS EC2, multiplayer.

You can access my other works through my GitHub profile.

Experiences

Sharz.Net	07.2024-09.2024
Software Department Intern / Front-end (React, NodeJS, TypeScript etc.)	
Exedra HR Bilişim	06.2025-08.2025
Software Department Intern / Postgresql, Docker, Git V.Control ve AI API integration	

Soft-skill exposure

Nevada Coffee	during summer
In a neighborhood where foreign customers are in the majority, a barista	
Pizza Hut	during summer
In a neighborhood where foreign customers are in the majority, I made pizzas
